

Envato Item Info | WP Plugin

Promote your Envato Items inside your website

version: 1.1 - by Michele Ivani - evographics.net

This is a how-to guide to install your plugin copy. If you have any questions that are beyond the scope of this help file, please feel free to email via my Envato user page contact form. **Thanks so much for purchasing this project.**

1. Getting Started

Change-log v.1.1

- Add Referral Links
- Bugs fixed

This plugin allows you to display all info about an Envato Marketplace item into your website. The Plugin is available for **regular site** with PHP support and for **WordPress** platform. The main folder contains both plugin types and PSD files for custom changes. In the next steps we are going to show how to set up the plugin correctly.

2. Plugin Installation | Regular Site

To install the Plugin on a regular website you have to:

- Upload all file inside "**envato-items-php-plugin**" folder on your host server
- Link the php file and the css style file inside the page in which you want to display the plugin

Copy and paste these lines below in the correct place of your php file

(Paste at the top of your php file)

```
<?php require_once('envato-items-php-plugin/envato-item-store-info.php'); ?>
```

(Paste inside the HEAD tag of your page)

```
<link rel="stylesheet" href="envato-items-php-plugin/envato-item-store-info.css" type="text/css" >
```

- Now you have to call the php function to run the plugin. This function has three parameters:
 - **\$envato_item_id**: a numeric value that identify an Envato Marketplace item ID (required)
 - **\$style**: a numeric value (0 by default) that set the plugin style
 - 0: for site with a light background (white, light grey...)
 - 1: for site in which the plugin will be display inside a dark container (black, dark grey...)
 - **\$username**: a string that contains the Envato Marketplace username for referral link (optional)

Below the function you have to paste inside the BODY tag of your page

```
<?php echo set_envato_item_info($envato_item_id, $style, $username); ?>
```

3. Plugin Installation | WordPress

When you are ready to install the plugin, you must first to upload the plugin files and active the plugin itself. The files can be uploaded in two ways:

- **FTP Upload:** Using your FTP client, upload the **non-zipped** plugin folder ("**envato-items-wp-plugin**") into the `/wp-content/plugins` folder on your server.
- **WordPress Upload:** Navigate to `Plugins > Add New > Upload`. Go to browse and select the **zipped** plugin folder. Hit "Install Now" and the plugin will be uploaded and installed.

Once the plugin is installed, you need to activate it. Go to Plugins and activate the *Envato Items Store Info* plugin.

Now if you want to run the plugin you have to call a sample **WordPress Shortcode**. Open, for example, a blog post and inside text editor (HTML view) paste the following shortcode:

```
[envato-item id=envato_item_id style=plugin_style username='envato_username' ]
```

Replace *envato_item_id* with an Envato item ID (ex: 3432268), *plugin_style* with **0** if you want to display the plugin on a light background, **1** if you want to display the plugin on a dark background and replace *envato_username* with a Envato Marketplace username to get referral link.

4. Photoshop Files

The Project includes two PSD files that allows you to edit the plugin as you want. A file contains the plugin layout; the other one contains the sprite image used by plugin itself. If you want to make same changes, edit this file and replace the old image with the new one. Do not forget to export the sprite image with the option "Save for web and devices".

5. Credits

This plugin uses following assets:

- Envato APIs to query item info

- The basket and money icons are distribute under commercial license by <http://pc.de/icons>
- The purchase button is distribute under commercial use by Orman Clark from <http://premiumpixels.com>
